

MacOS VMware Horizon Client Installation Instructions

1. On the Mac client system, download the Horizon Client installer file for Mac from VMware using the link provided on <http://support.hshs.org>.
2. Double-click the .dmg file and click Agree.
 - a. The contents of the disk image appear in a Horizon Client Finder window.
3. In the Finder window, drag the VMware Horizon Client icon to the Applications folder icon.
 - a. If you are not logged in as an administrator user, the Mac client system prompts you for an administrator user name and password.
4. Restart your Mac whether you are prompted or not.
 - a. Failure to do so may result in Horizon not launching correctly.
5. After installation, you will be able to access <https://home.hshs.org> using your browser to launch your applications.
